

BRIGHTENING YOUR DAY WITH SOLAR POWER

ENERGY & SOLAR
SOLUTIONS

OUR STORY

In 2014 a retired industrial engineer and his three sons saw the need for a complete solution in the energy sector across Pakistan. He wanted to help more and educate people on this technology and spread the knowledge on its benefits. Due to the energy crises faced by millions in Pakistan, customers across residential and commercial sector kept inquiring about sustainable energy solutions from Energy & Solar Solutions.

He realized the opportunity to support his growing family and help others expanding businesses by providing custom solutions in renewable energy sector. He started from his house garage in Karachi, Pakistan. Business really started to take off in the solar energy solutions for both commercial and residential markets and people were loving the customer support and quality of material provided by ESS.

Pretty soon ESS were able to move to a professional studio where they could explore and implement ideas for the local demands, with much determination they developed a relation with Chinese and overseas manufacturers and suppliers to make affordable and quality energy solutions on international standards.

They were often days of trial and error, but soon ESS was a successful, well-developed business with customers all over Pakistan. With his extensive 30 years of experience in the industrial energy solutions, he and his sons had discovered the best practices and systems for various industrial, commercial and residential demands.

Today you have an awesome team of people who specialize in solar energy installation, and have wide knowledge in the industry. For over 5 years the team has been delivering quality solution and support to their valued customers with honesty and trust. They fabricate and build all project needs in their town workshop for all type of customer-specific needs. Key specialty of their team is providing economical custom aluminum, M.S Steel sheds and structures for solar PV mountings.

 We look forward to help you and your business by providing finest energy solutions
Shahzad Amin | CEO | Energy & Solar Solutions

WHY CHOOSE SOLAR FOR YOUR HOME?

- ✔ After initial investment, all the electricity you produce is free.
- ✔ Reduces or completely eliminates your electric bill.
- ✔ Cost of electricity tariffs is increasing day by day, while solar secures your tariff.
- ✔ Solar panels have life and ROI of 25 to 30 years.
- ✔ Virtually no maintenance and no recurring costs.
- ✔ Ideal for remote locations that cannot be tied to the grid.

SMART BUSINESSES SAVE WITH SOLAR

- ✔ Reduces operating costs - Monthly savings from investing in solar can contribute significantly to your business bottom line.
Return on investment - Decreased energy bills, evades tariff slabs.
- ✔ Worry-free operation - Extremely reliable solar panels require virtually no maintenance, so you can focus on running your business.
- ✔ Go green, make green - Customers increasingly support businesses that are environmentally responsible. It's great for your brand and the planet. That's a win-win.
- ✔ Financing options available - Create a cash-positive project from day on. talk to your installer about the multiple ways you can finance a system.
